- Integrations & Ongoing Maintenance

Design & Branding

- Brand Identity & Logo Design
- UI/UX & Landing Page Design
- Mobile App Design
- Social Media & Motion Graphics
- Creative Direction

Our Work

in.culcate Kids

Kids Entertainment

Branding & UI/UX

The challenge

Create an identity and app UI for in.culcate's new kids' sub-brand — one that feels warm, playful, and timeless, while staying true to the parent brand's DNA.

What we did

Defined the complete in.culcate Kids brand from the ground up, then designed a kid-friendly streaming app UI around it — carrying the parent brand's identity through every screen.

The result

Our design system was adopted as the core of the app with no external rework — and is now the foundation of the product heading into launch.

Our Work

ARR Dental Lab

Healthcare

Full-stack Website

The challenge

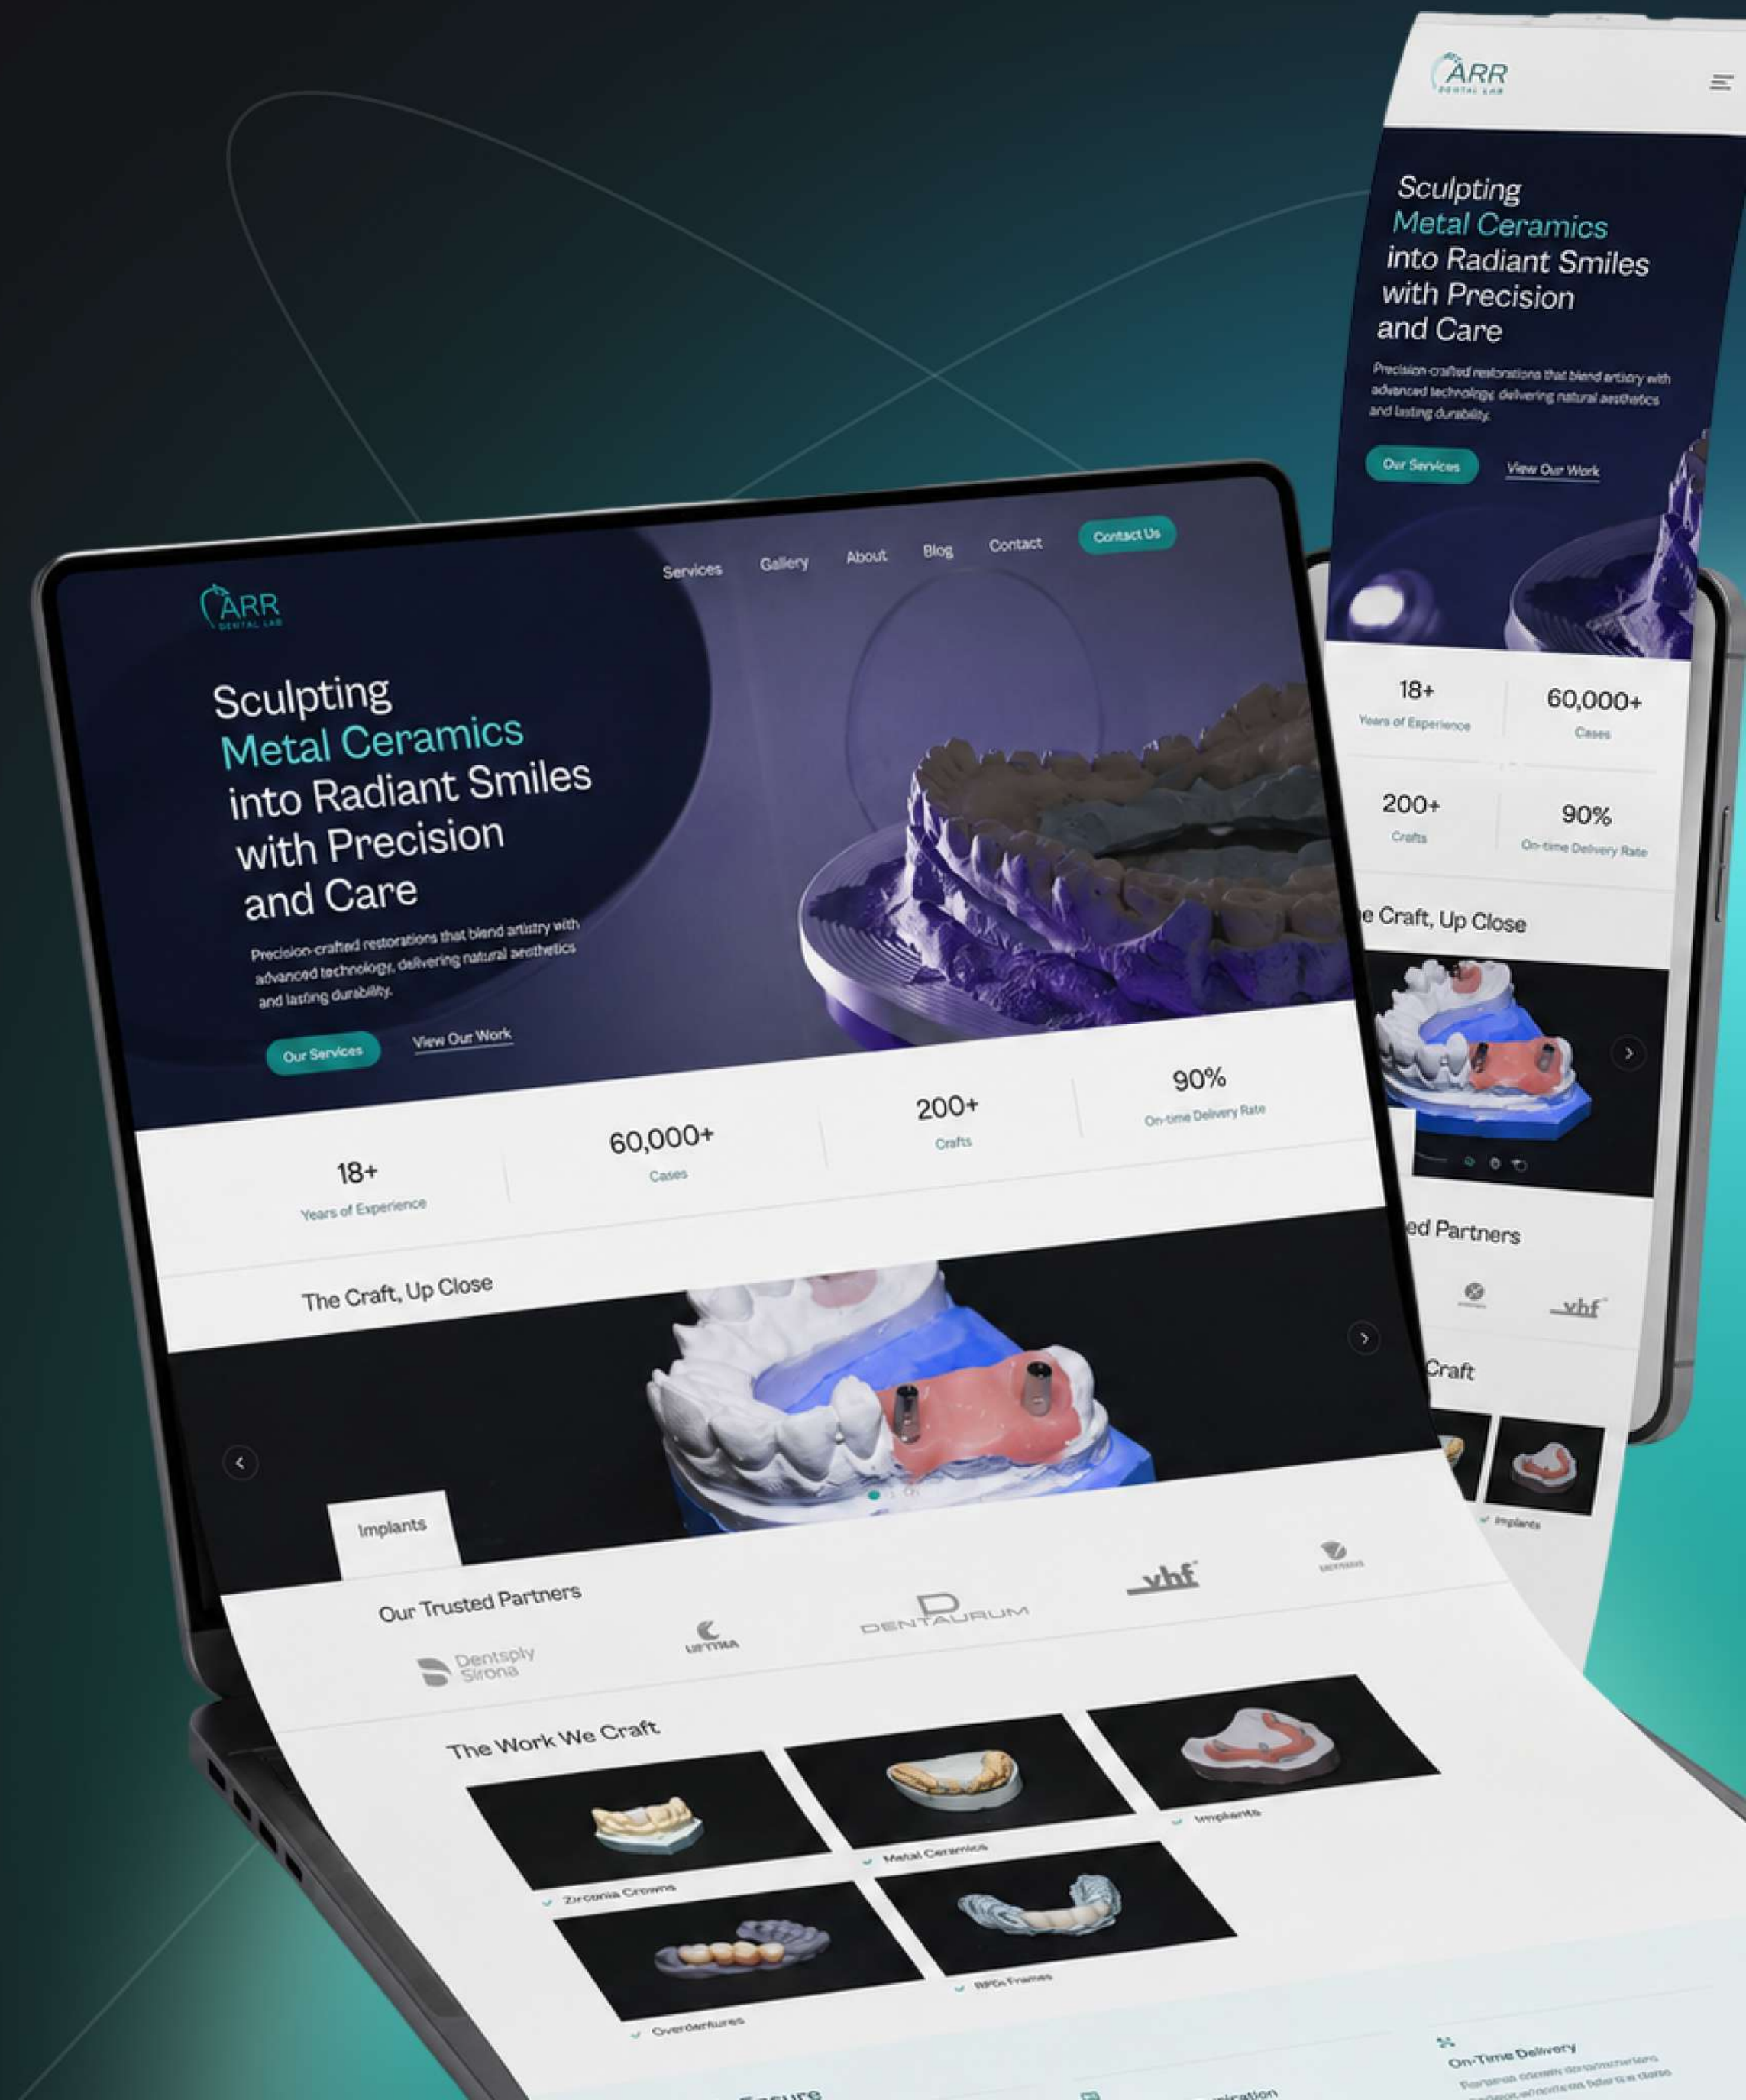

An outdated, barebones WordPress site that wasn't representing the lab professionally — and wasn't built to support any real online presence.

What we did

Rebuilt the entire website from scratch in just 6 days — replacing the old WordPress setup with a fast, modern full-stack site designed to be the foundation of their online presence.

The result

A complete digital reset — the lab went from an outdated site to a professional web presence overnight, now serving as the starting point for their organic growth.

Our Work

thebetterhalf

Fashion / D2C

Shopify Store

The challenge

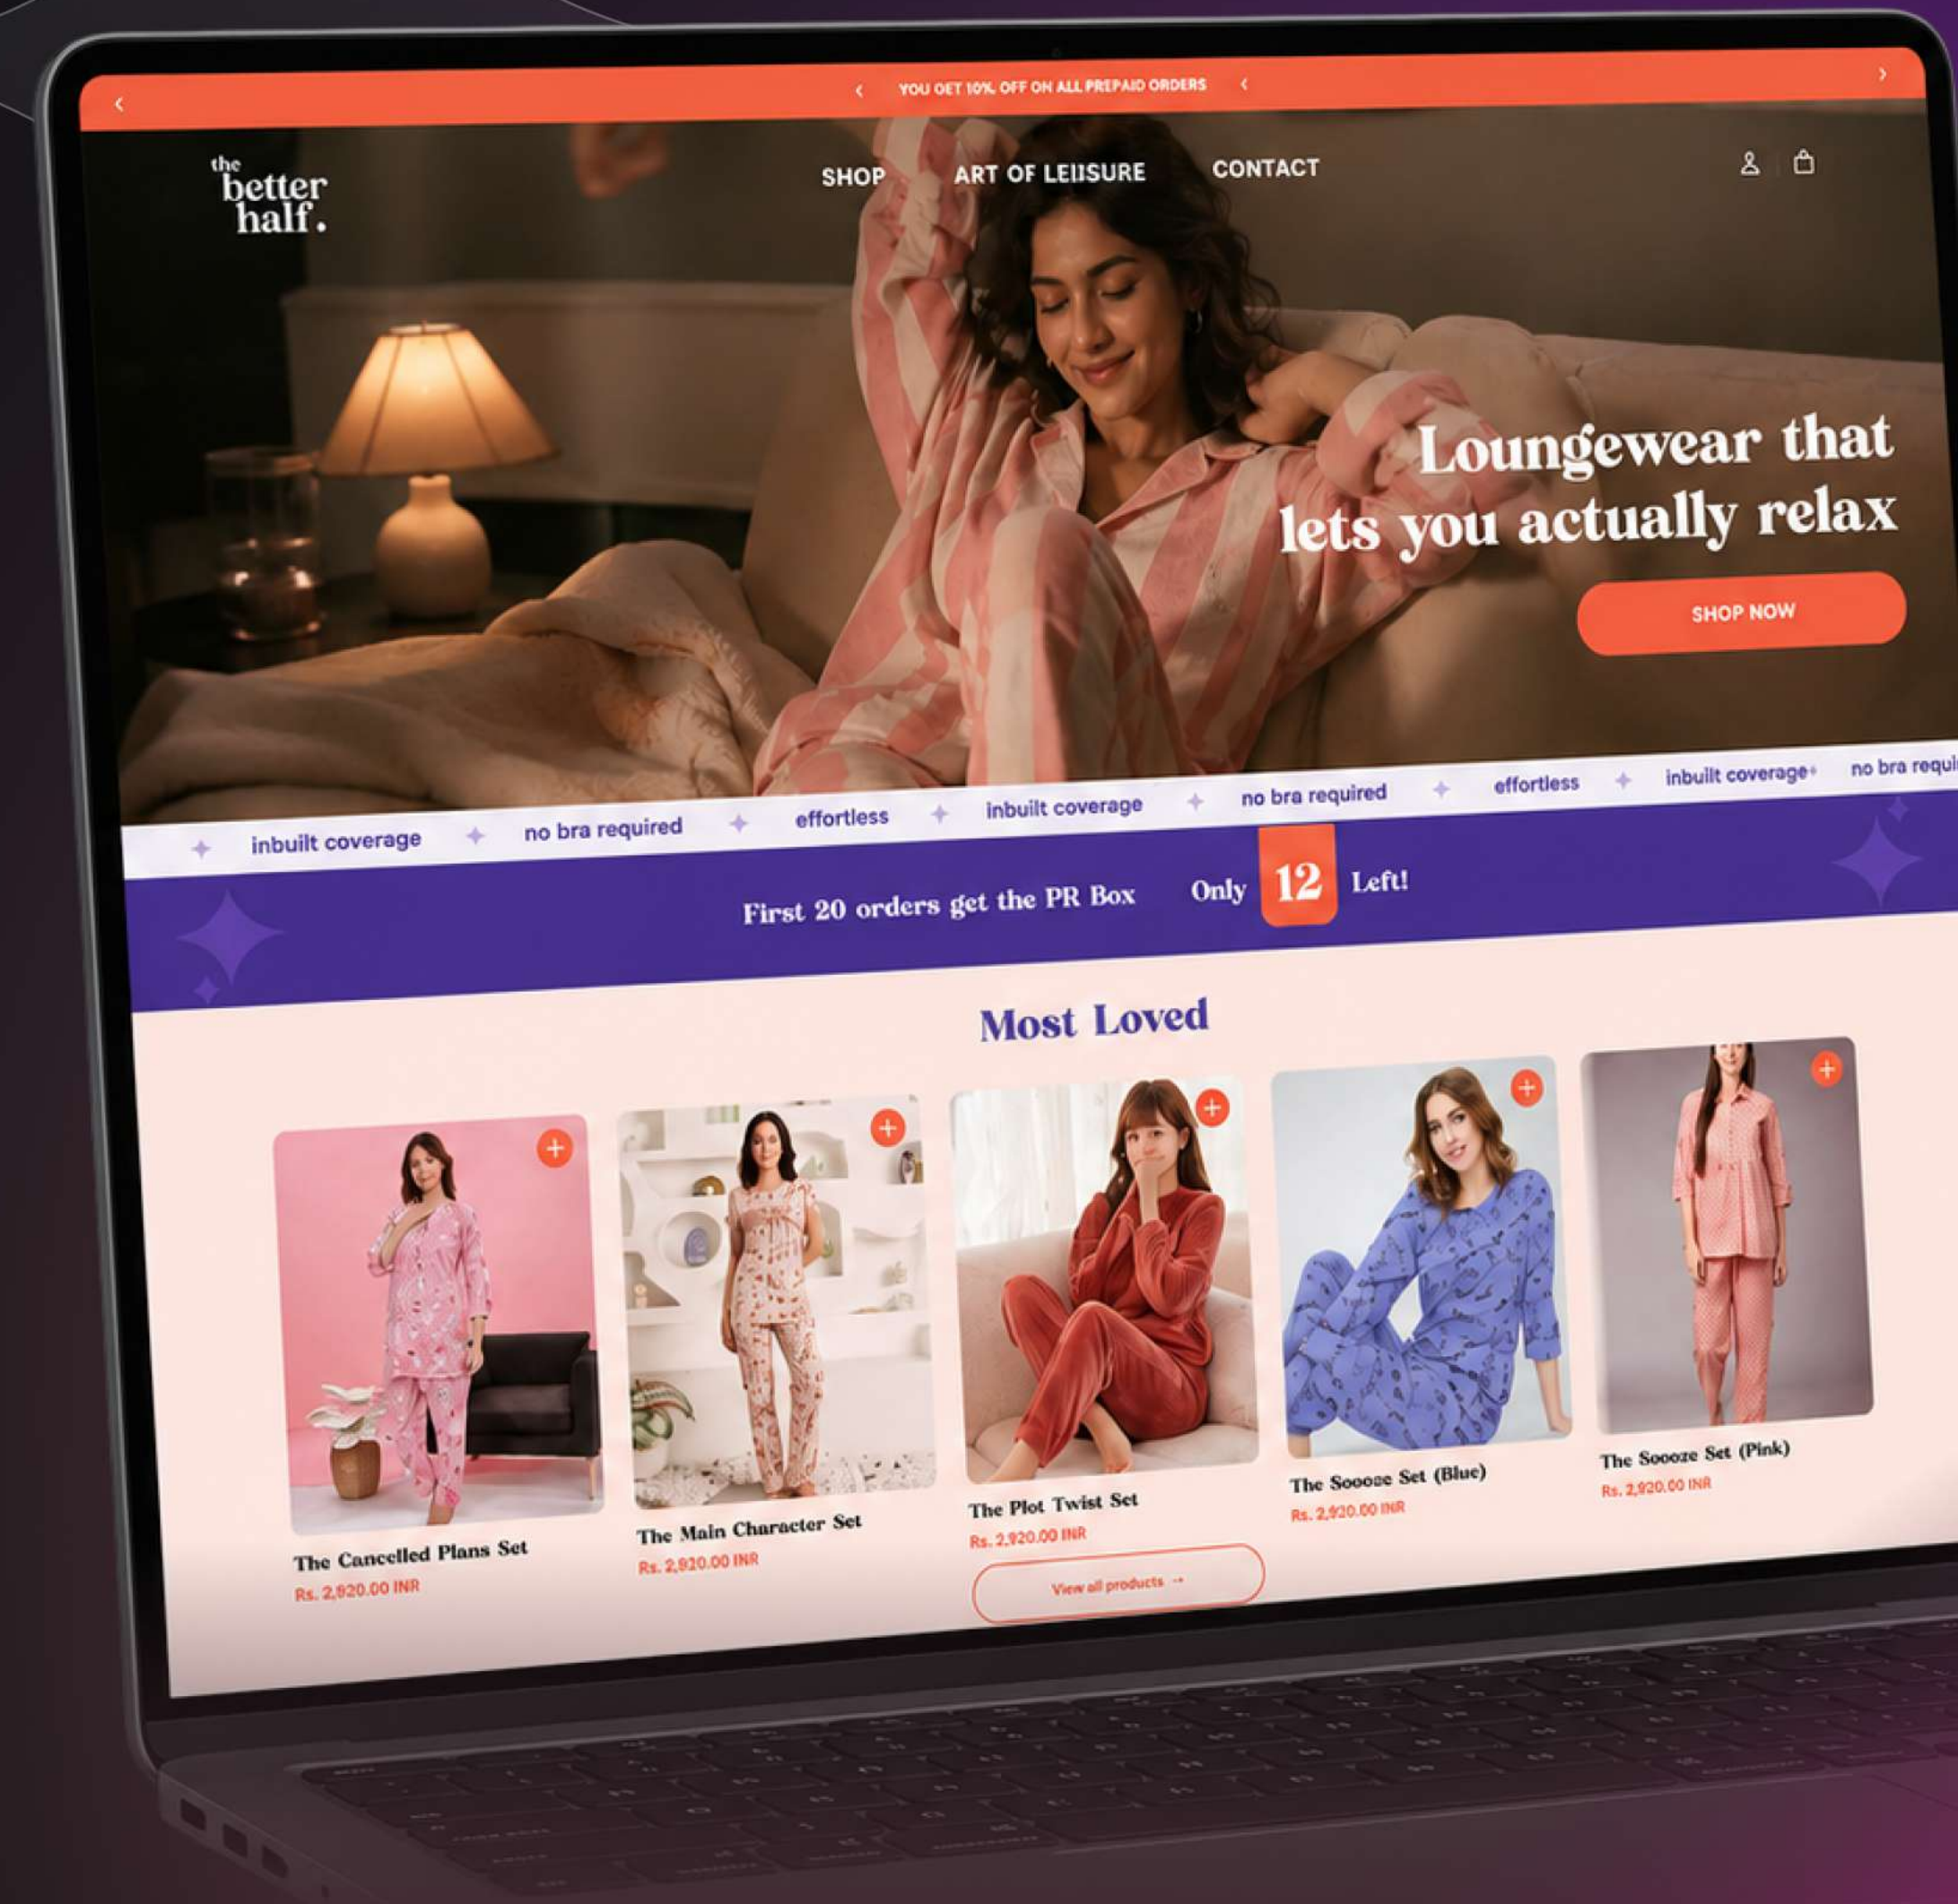

Bring a women's loungewear startup to life on Shopify — translating their finished designs into a real store, pixel-perfect, without compromise.

What we did

Translated their finished designs into a fully functional Shopify store — theme setup, plugin configuration, payments, and everything needed to run e-commerce from day one.

The result

Pixel-perfect Shopify build delivered in 3 weeks — fully editable in the site builder, so the team ships new pages without touching a developer.

Truee Valuer Associates

Real Estate Services

Logo & Brand Identity

The challenge

An AI-generated logo was undermining client trust, and the lack of a proper brand foundation made every social post look inconsistent.

What we did

Designed a new logo and identity system in just 48 hours — a modern, timeless mark built around their core business, ready for professional use everywhere.

The result

A complete identity turnaround in 2 days — now used consistently across all client-facing material, replacing the AI-generated look with a brand that earns trust.
